1) ASME Class 900-1500 available only in 0.75 to 4 inch (20 to 100 mm) sizes.

ASME Class 2500 available only in 0.75 to 2 inch (20 to 50 mm) sizes.

2) See Materials of Construction Tables for other temperature limitations.

3) 2-Stage design only available with Quick Change seat rings.

4) 2-Stage Anti-Cavitation Trim not available in 6 inch (150 mm) and 8 inch (200 mm) size.

5) LE* Packing for low emissions applications is limited to maximum pressure and temperature as shown in the chart below.

6) Soft seat is limited to a maximum of 1000 psi (70 bar) shut-off and a maximum of 450°F (232°C).

Standard Bellows Seal construction available for ASME Class 150 - 300 (PN 20 - PN 50) and capacities of $C_v = 1.7$ and higher.

1. Close clearance 0.75 and 1 are available in quick change trim only (Model 21114).
2. Models 21614 and 21615 available only in Cv ranges as indicated by gray background.

1) Materials and processes in accordance with the requirements of NACE specification MR0103. Applications requiring

compliance to MR0175, 2003 Rev. or ISO 15156 would require engineering review.

2) Inconel 718 will be substituted in applications when required due to the differential pressure.

3) Materials designated for these parts conform to NACE Class III (unexposed) bolting requirements.

4) Materials designated for these parts conform to NACE Class I or Class II (exposed) bolting requirements.

5) Consult Masoneilan for NACE Applications above ANSI Class 600 (PN 100) rating or above 450°F (232°C).

6) Optional component and materials for Close Clearance low flow trim option.

7) To be used with stainless steel body and bonnet.

8) Guide bushing not used with close clearance trim.

9) Solid Stellite or Equivalent is not available for Lo-dB/Anti-Cavitation plugs.

1) Materials recommended for Cryogenic Liquid Natural Gas (LNG) applications -320°F (-196°C).

Consult factory for suitability in other cryogenic applications.

2) Consult factory for NACE applications.

3) Trim offerings limited to Quick Change designs only.

4) Consult factory for proper actuator sizing to provide correct valve shut-off.

5) JIS and EN material equivalents are available.

6) Body stud materials also satisfy the requirements of the pressure equipment directive 97/23/EC.

Bellows Seal Design Features 21000 BS Series

Standard Construction

Bellows seal configuration is fully compatible with the standard 21000 Series trim and actuator options providing equivalent capacity capabilities for each valve size. The standard packing box design and packing design options are used as a secondary stem seal.

Rugged Design

The formed bellows construction is an externally pressurized design that is capable of operating up to the full valve ANSI B16.34 pressure rating. Guides are located above and below the bellows providing excellent stability to withstand flow induced and mechanical vibration.

Extended Life

The bellows assembly is designed for 50% compression/extension (zero stress) at the valve mid-stroke position to help maximize cycle life. Bellows torsional stresses are also reduced with the anti-rotation feature provided by flats on the plug stem.

High Quality

Each bellows subassembly is helium leak tested to verify weld integrity, and is also hydro-statically tested as part of the complete valve assembly. Mechanical travel stops are also designed into both the bellows and valve assemblies to prevent over compression or extension.

Smart Solution

Bellows installed cycle life can be monitored in the field by utilizing Masoneilan's SVI® Digital Positioner with actual process data. This advanced preventative maintenance option will help improve plant safety by identifying potential hazardous failures before they happen, and cut cost by reducing premature bellows replacement.

Bellows Materials Standard Material

316/316L Stainless Steel

Optional Materials

Hastelloy C276

Monel 400

Inconel 625

Size and Ratings

Pressure Ratings: ASME Class 150 and 300 – PN 20 and PN 50

Valve Size	Bellows Design Stroke		Life Cycle Ratings ⁽¹⁾		
	Inches	mm	100%	50%	25%
.75"-2"	75	19	100,000 Full Cycles	600,000 Full Cycles	3,000,000 Full Cycles
3"-4"	1.50	38.1			
6"	2.00	50.8			

(1) Minimum expected average cycle life for Class 300 (PN 50) bellows operating at constant pressure.

(2) Consult Masoneilan for Bellows applications above ASME Class 300 (PN 50).
